

Simplicity, modern design combined with excellent functionality.

Maximum cleanliness, protection for patients and staff.

Warehouses for Clean Rooms

Production

Clean Hallways and Clean Offices

Personnel and Material  
Pass-Throughs

## Design

We design what you need, not what we can easily make a profit on. We want to help you throughout the entire construction preparation process so that everything is completed by the realization of your needs and plans.

## Implementation and Installation

We build exactly what you require. We can handle unexpected issues during construction, which is why it's important for you to be involved and confident in the process. You can trust that PURUS PRO truly knows what they're doing.

## Validation

The team of validators we work with is experienced and independent. They can evaluate and validate your projects, constructions, and operations in accordance with the regulations relevant to your production.

## Warranty and Post-Warranty Service

We work immediately with maximum effort to eliminate any serious issues as soon as they arise. Sometimes things can go wrong, but we know how to face them head-on.

# Components

for the Realization of Cleanrooms

Wall Systems, Partitions, Cladding, and Glazing / Floors / Doors / Lighting  
Pass-through Cabinets / Ceilings / Filtration Units / Laminar Flow Fields
